

Important Notes:01) Investment in the E Fund Selection Investment Series – E Fund (HK) Select Bond Fund (the “Sub-Fund”) is subject to normal market fluctuations and other risks inherent in the Sub-Fund’s assets. Accordingly, there is a risk that you may not recoup the original amount invested in the Sub-Fund or may lose a substantial part or all of your investment. 02) The Sub-Fund invests primarily in a portfolio consisting primarily of investment grade debt securities denominated in offshore RMB, USD, EUR or HKD which aim to generate a steady flow of income in addition to capital appreciation for the Sub-Fund and may be subject to a) Risks relating to debt securities (including Credit risk, Risks relating to credit rating, credit rating downgrading risk, Interest rates risk, Valuation risk, Volatility and Liquidity risk, Sovereign/government debt risk, Below investment grade or unrated securities risk and Risks associated with investments in debt instruments with loss-absorption features (LAP)), b) Concentration risk, c) Emerging market risk, d) Foreign exchange risk, e) Risks relating to sale and repurchase agreements, f) Risks relating to reverse repurchase agreements, g) RMB currency risk and RMB denominated classes risk, h) Hedged RMB denominated classes risk, i) Convertible bonds risk, j) Risks relating to equity securities, k) Eurozone and European country risk and l) “Dim sum” bond risk. 03) The Sub-Fund may invest in derivatives for hedging or investment purposes to the extent permitted by the Code and in adverse situations its use of financial derivative instruments may become ineffective and/or cause the Sub-Fund to suffer significant loss. 04) Distributions of the Sub-Fund may be paid out of the capital of the Sub-Fund. Investors should note that payment of distributions out of capital amounts to a return or withdrawal of part of an investor’s original investment or from any capital gains attributable to that original investment and such distributions will result in an immediate reduction of the net asset value of the relevant units. The distribution amount and net asset value of the hedged unit class may be adversely affected by differences in the interest rates of the class currency of the hedged unit class and the Sub-Fund’s base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged unit classes. 05) You should not invest in the Sub-Fund unless the intermediary who sells it to you has explained to you that the Sub-Fund is suitable for you having regard to your financial situation, investment experience and objectives. 06) Investors should not invest in the Sub-Fund based on this document alone. Before making any investment decision, the investor should read the Sub-Fund’s offering documents carefully including the risk factors.

Fund Information

Fund Manager:	E Fund Management (Hong Kong) Co., Limited
Inception date:	2016-12-16
Base Currency:	USD
Dealing & Valuation Frequency:	Daily
Trustee:	ICBC (Asia) Trustee Company Limited
Auditor:	Ernst & Young
Fund Size:¹	USD 2047.68 million
Legal Structure:	Unit Trust
Fund Manager:	Jeffrey Qi, Fei Wang
Domicile:	Hong Kong

Investment Objective Summary

The investment objective of the Sub-Fund is to achieve long term capital growth through investing globally in a portfolio consisting primarily of debt securities denominated in USD, EUR, HKD or offshore RMB (“CNH”), which aim to generate a steady flow of income in addition to capital appreciation for the Sub-Fund.

Notes: Past performance information is not indicative of future performance. Investors may not get back the full amount invested. Performance data has been calculated in the respective currencies of the classes, including ongoing charges and excluding subscription fee and redemption fee you might have to pay. No performance data can be displayed until 6 months from inception date. Where no past performance is shown there was insufficient data available in that year/period to provide performance.

1 Including HK Classes and Mainland China Mutual Recognition Classes.

2 "Launch Date" referenced herein denotes the launch date of the class. In the event of a full redemption followed by a relaunch, it refers to the date of the latest relaunch.

3 You should note that some fees may be increased, up to a specified permitted maximum 3%, by giving Unitholders at least one month's prior notice. For details please refer to the related section in the Explanatory Memorandum/Prospectus.

4 Previous USD Class I (Acc) has been renamed to USD Class I2 (Dis) effective from 13 Oct 2022.

5 NAV-to-NAV return, total return with dividend (if any) reinvested. For the performance of the class launch year, it reflects the period from the launch date to the year-end. As the class was not in operation for a full calendar year, it may not be indicative of long-term performance under varying market conditions.

Monthly Market Commentary

Market Review

US economic data released during the month was broadly weaker, with a notable deterioration in employment. Non-farm payrolls declined by 23,000, far below the expected increase of 80,000, while the May-June figures were revised down by a combined 103,000; the unemployment rate fell to 4.1% and the labor force participation rate declined to 61.4%. Retail sales fell 0.6% MoM, versus expectations of a 0.1% increase, while industrial production and manufacturing output both rose 0.2%. On inflation, headline CPI rose 3.4% YoY and core CPI 2.5% YoY, both in line with expectations, but core PCE rose 3.34% YoY and headline PCE rose to 3.70% YoY, signaling that inflation remains sticky. The preliminary annual non-farm payroll benchmark revision released on August 28 showed a downward revision of 79,000, further confirming the cooling of the labor market.

As employment data weakened, yields briefly declined in early August, with the 2-year yield falling from 4.29% to 4.18%. Mid-month, geopolitical risks re-emerged: after the US-Iran ceasefire agreement expired on August 17, the conflict flared again, pushing oil prices back above \$94, while the federal debt surpassed \$40 trillion and heavy issuance of AI-related corporate debt crowded out long-duration investors. As a result, the 30-year Treasury yield rose to 5.31% on August 17, its highest level since June 2007. On August 19, the U.S. Treasury announced that it would at least double the size of its 10-30 year Treasury buyback program, and the 30-year yield fell 9 basis points on the day. At the Jackson Hole conference at month-end, Fed Chair Warsh delivered a speech titled "The Times We Are In," reaffirming the 2% inflation target with an overall hawkish tone, and the market's pricing for a September rate hike rose to roughly 57%. Over the full month, the U.S. Treasury 2-year, 10-year and 30-year yields moved by roughly +5, +2 and -3 basis points respectively, leading to a marked flattening of the curve, in sharp contrast to the bear steepening seen in July. On the index front, The Bloomberg U.S. Intermediate Aggregate Bond Index rose 0.3% this month. Overall, in August the U.S. Treasury market displayed a flattening pattern characterized by pressure at the short end and policy support at the long end.

Portfolio Review

In August, Fed Chair Warsh maintained a hawkish stance at the Jackson Hole symposium, and US interest rates remained range-bound at elevated levels. On country/region allocation, the portfolio continued to focus on the US, UK, and Germany. Sector allocation was concentrated primarily in insurance, banks, and sovereigns.

Market and Portfolio Outlook

Looking ahead, the market will remain focused on Fed policy and developments in the Middle East geopolitical situation, and the portfolio plans to pursue opportunistic range-bound trading.

Notes: 1 Sector Exposure is expressed as a percentage of the aggregate market value of all holdings of time deposits, securities and derivatives (if any), where holdings such as collective investment schemes and derivatives (if any) are included in "Others".

2 Geographical Exposure refers to Bloomberg's Country of Risk and is expressed as a percentage of the aggregate market value of all holdings of time deposits, securities and derivatives (if any), where holdings such as collective investment schemes and derivatives (if any) are included in "Others".

3 Expressed as a percentage of the aggregate market value of all bond holdings.

4 The weighted average credit rating of all bond investment held in the portfolio.

5 Non-bond instruments are not included. Yield to Worst is the lowest potential yield on a bond without the issuer actually defaulting. It is calculated by making the worst-case scenario assumption on each issue. It does not represent the actual performance of the fund or the interest that investors may receive.

6 The distribution records for the last 12 months can be found on our website.

7 Annualized dividend rate = $[(1 + \text{Dividend per Unit} / \text{Sub-Fund NAV as of Ex-Date})^{(365 \text{ Days or } 366 \text{ Days (if applicable)} / \text{Days in distribution period})} - 1] \times 100\%$.

8 Top 10 Holdings are the 10 largest holdings of time deposits, securities and derivatives (if any), expressed as a percentage of the aggregate market value of all holdings of time deposits, securities and derivatives (if any), plus cash and cash equivalent.
